

OUR ALL NEW OPERATOR APP

Operator App:

Representing a new era of operational efficiency, our Operator App champions seamless and paperless communication. This purpose-built app centralises and standardises everything 'operator related'. We are digitally transforming and automating onboarding, compliance, scheduling, timesheet recording and management. By consolidating all timesheet and daily defect reporting into one user-friendly app, we've created a frictionless process for our operators. We have also enabled operators to register their information for upcoming projects, revolutionising the way we engage with our workforce.

Are you using our new operator app?

We can support with digitally transforming processes on your sites. Contact us if you'd like the operator app onboarded on your site at recruitment@l-lynch.com.

Plant operators: Did you know you can use the Lynch App to register for new up-and-coming projects nationwide?

Download today on the [app store](#) and [play store](#).
